Assistant Instructor:	^P Skayian, Heghnar S.

The Department of Geology offers programs leading to the degree of Bachelor of Science in Geology, and Master of Science degrees in certain areas of the vast field of geological sciences. It also offers a more broadly based program leading to the degree of Bachelor of Science in Petroleum Studies. Students wishing to major in geology or petroleum studies must secure the approval of the department. In addition, students must have a strong background in sciences and have taken the freshman science program or its equivalent.

The department also offers the following undergraduate elective courses: GEOL 101, GEOL 102, GEOL 103, GEOL 104, and GEOL 201 in the area of general geology, and GEOL 205 in environmental geology.

Field trips are required parts of most geology courses.

Undergraduate Program

Geology majors must attain a grade of 70 or more in GEOL 201 and GEOL 203, and pass their next two geology courses with a grade of 70 or more. Majors must complete the following courses, in which a general average of 70 or more must be maintained: GEOL 202, GEOL 210, GEOL 211, GEOL 212, GEOL 213, GEOL 214, GEOL 219, GEOL 221, GEOL 222, GEOL 224, and GEOL 229, which is a total of 40 credits. In addition, three required elective courses - CMPS 209 (or a 200-level CMPS course), and 200-level economics and education courses (6 credits) - must be completed. No course may be taken without its prerequisite unless authorized by the departmental faculty. Students are encouraged to take additional geology courses such as GEOL 205, GEOL 207, GEOL 215 or GEOL 225, and also courses from the graduate level, provided other requirements permit.

The requirements for a BS degree in Geology are 90 credits for students entering the department at the sophomore level, including 40 credits in the major. The distribution of university requirements is as follows:

University Requirements:

- University Language requirements: English (6 cr) and Arabic (3 cr)
- University General Education requirements: Humanities (12 cr), Social Sciences (6 cr), Natural Sciences (9 cr) and Quantitative thought (3 cr).

GEOL 203 Physical Geology Laboratory 0.2; 1 cr.

An introduction to the identification of rocks and minerals in hand specimen, geographic and geological maps, and basic interpretation of geological data. *Pre- or corequisite: GEOL 101, GEOL 102, GEOL 103, or GEOL 201, or consent of instructor. Each semester.*

GEOL 205 Earth Resources and Energy 3.0; 3 cr.

A study of the main economic mineral resources and traditional and alternate energy resources, with an emphasis on the environmental impacts of their use and misuse. A special emphasis is given to regional issues. *Open to both arts and sciences students. Each semester.*

GEOL 207 Map Interpretation 2.2; 3 cr.

A course on the description, reading and interpretation of topographic and geological maps. This course also introduces stereographic projections, construction of cross-sections across geologic structures, and basic field mapping techniques. *Prerequisites: GEOL 201, GEOL 203, or consent of instructor. Occasionally.*

GEOL 210 Geomorphology 3.0; 3 cr.

An introduction to the study of land forms and the interaction of external geological forces and erosion agents with the structure and composition of their surface rocks. This course is also an examination of the interaction between the internal and external earth processes responsible for the development of land forms. *Prerequisites: GEOL 201 and GEOL 203, or concurrently, with consent of instructor. Annually.*

GEOL 211 Crystallography and Physical Mineralogy 2.2; 3 cr.

An introduction to the study and classification of crystals; properties of minerals as related to their crystal structure; identification, description, and classification of minerals. This course entails practical work with crystal models and hand specimens of common minerals. *Annually.*

GEOL 212 Optical Mineralogy 2.2; 3 cr.

An introduction to the theory of crystal optics, the polarizing microscope, and methods of mineral identification based on their optical properties. This course is also a systematic study of the common rock forming minerals in thin section. *Prerequisite: GEOL 211 or consent of instructor. Annually.*

GEOL 213 Structural Geology 2.2; 3 cr.

Introduction to the study of rock deformation, the relationship between stress and strain, and the interpretation of structures and their significance to regional and global tectonics. *Prerequisite: GEOL 201. Annually.*

GEOL 214 Stratigraphy 2.2; 3 cr.

A course on the principles of interpretation of the sedimentary rocks and methods of correlation and an introduction to the stratigraphy of Lebanon in the context of the regional geology of the Middle East. *Prerequisite: GEOL 222 or consent of instructor. Annually.*

GEOL 215 Invertebrate Paleontology 2.2; 3 cr.

An introduction to the systematic study of invertebrate fossils, their classification and identification, using macro-specimens and thin sections. *Prerequisite: GEOL 202. Annually.*

GEOL 219 Geologic Field Methods 0.6; 3 cr.

An introduction to applied methods used in field geological mapping. This course also provides a description and interpretation of geological maps, and construction of cross-sections. *Prerequisites: GEOL 201, GEOL 213, or consent of instructor. Annually.*
